

Seamless OAE Data Transfer

Eden Prairie, Minnesota - Grason-Stadler is pleased to announce that the GSI Corti OAE diagnostic and screening instrument is now compatible with GSI Suite, GSI's audiometric data management software. This integration provides flexibility in comprehensive reporting by offering the option to combine audiometry, middle ear evaluations and OAE patient data into a single report. The flexible template editor allows unlimited combinations of tests to meet the reporting demands of referral sources and patient types. It's easy to network data from multiple instruments by combining GSI Suite with Noah 4.

Learn more about the seamless capabilities with GSI Corti and GSI Suite.
